Diamond Chase Static GT Series

The Static GT series is a part of the Diamond Chase Stretch and Glue screen printing frame system. They are manufactured from high-quality, custom made extrusions. Specifically designed by Diamond Chase, these profiles have rounded edges for comfortable handling and are engineered for the strength and weight characteristics required. Each frame is welded watertight, leveled, and sandblasted for excellent adhesion.

FEATURES

- High quality, custom rounded extrusions
- Welded watertight, leveled and sandblasted for excellent adhesion
- Optional pre bow, threaded inserts, and locator bushings
- Double hollow options for greater tensioning capacity, reduced frame deflection, stronger, with greater image area
