Fimor serilor® HR Series

Serilor HR is a special polyurethane blade with exceptional combined resistance to chemicals and abrasion. It was developed to withstand the toughest applications in screen printing and to have a long shelf life in most environments.

Within the Fimor serilor series, the HR blade is known for its high resistance and compatibility with electronic and industrial graphics as well as automated textile printing.

Serilor HR blades are manufactured with a centrifugation process to avoid bubbles and craters in the material and to bring optimal homogeneity to the compound, even at the core of the material and after grinding.

FEATURES

- Sharpens well
- High environment stability
- Individual package and batch information printed on each blade
