Fimor serilor® LC Series

Serilor LC Series squeegee blades are cast from a newly developed polyurethane formulation designed to achieve performance at an attractive price. Available in a limited range of dimensions/hardness combinations, serilor LC is an excellent choice for applications ranging from textile to graphic printing.

Within the Fimor serilor series, the LC squeegee blade is the best value. The price is competitive and the product is ideal for textile printing.

Serilor LC blades are manufactured with a centrifugation process to avoid bubbles and craters in the material and to bring optimal homogeneity to the compound, even at the core of the material and after grinding.
