Grünig G-STRETCH 208 Series Frame Pre-Bowing Device

The G-STRETCH 208 is a frame pre-stretching device that can improve reproducibility while increasing stretching quality. The pre-stressing procedure ensures that after cutting out the mesh, the drop in tension will be considerably reduced.

FEATURES

- Allows angular stretching
- Simple size adjustment
- Safe and simple to use
- Reduced loss of tension after gluing and cutting out mesh

PRODUCT OPTIONS

Model	Actuation	Stretch Device Integration	Available Size Range
208M	Mechanical	N/A	1000 - 2000 mm (~40" - 80")
208P1	Pneumatic	G-STRETCH 281	1500 - 3000 mm (~60" - 120")
208P2	Pneumatic	G-STRETCH 281	2000 - 4000 mm (~80" - 160")
