Protec MTG-08A Series Metal Mask Tension Meter

The MTG-08A Metal Mask tension meter is exclusively designed for metal screen masks.

Conventional metal screen tension gauges rest on the mesh itself when measuring. However, the hardness of the metal screen prevents the gauge from getting a truly precise measurement. In contrast with that, the MTG-08A's support points are outside of the metal screen, on the frame, ensuring accurate and precise measurement.

The MTG-08A is easy to use, including measurement marks on the support arms to enable precise placement of the measure point.

FEATURES

- Digital display
- Includes data output port
- Supports directionality of measurement
- Semicircle measurement head

PRODUCT OPTIONS

Model	Support Arm Size	Weight
MTG-08A-500	320 - 480 mm (~12.5" - 18.75")	2,100 g (~4.6 lb)
MTG-08A-700	320 - 680 mm (~12.5" - 26.75")	2,300 g (~5 lb)
MTG-08A-1000	320 - 980 mm (~12.5" - 38.5")	2,600 g (~5.75 lb)
