

# RhinoClean™

## PRODUCT DATA SHEET

### ER9500L™ Emulsion Removing Solution

#### Description

- Highly concentrated, easy to dissolve Emulsion Reclaiming Concentrate.
- Designed for quick and convenient removal of emulsions and capillary films from screens.
- Excellent freeze/thaw characteristics.
- Ideal for use in all climates.
- Never separates out active ingredients.

#### Directions

1. Dissolve contents of ER9500L™ into water (up to 1part concentrate to 30 parts water) to make reclaiming solutions.
  - Note: elevated amounts of water will slow effectiveness of product.
2. Spray and brush the solution of ER9500L™ onto both sides of stencil until emulsion dissolves.
3. Rinse off with high-pressure cleaner.

**It is the responsibility of the screen printer to test the product; review the MSDS prior to use to evaluate whether or not the product is correct for the application intended.**
