

product solution

RhinoTech RBP 1200™ Water Based Activator

RBP 1200 is a water-soluble, non-hazardous priming accelerator. Adhesive primers, such as RBP 1200, are used to enhance and accelerate the cure speed of cyanoacrylate adhesives such as RhinoBond™. They permit fast, efficient bonds in a high speed production environment.

The cure mechanism is very simple. Adhesive is applied to one substrate and the primer is sprayed or brushed onto the other substrate. Curing occurs immediately when the two parts are joined.

PURCHASING OPTIONS

Available in

8 Ounce, 1 Gallon Size

* *Free shipping offer only valid for DYNABOND and RhinoTech adhesive products. Must be either a new customer, or an existing customer ordering adhesive products for the first time. Some additional restrictions may apply. **Contact your sales person** for more details and to order.*
