Shur-Loc® Squeegee Clean

The Squeegee Clean system cleans manual and automatic squeegees easily and efficiently. Simply insert the squeegee between the brushes and slowly turn the handle. The scrubbing action of the quad-brush formation will clean the dirtiest squeegees in seconds.

Built for a lifetime of squeegee cleaning, the Squeegee Clean's metal construction resists nearly any solvent used. The drip spouts located on either side of the Squeegee Clean allow for collection containers to be placed at each end for capturing any solvent that drips from the ends of the squeegees. Additionally, the universal size of the Squeegee Clean allows for any length squeegee to be cleaned with ease.

The Shur-Loc Squeegee Clean system includes a variety of optional accessories that make the Squeegee Clean even easier to use.

PRODUCT OPTIONS

Automatic Press Lid

The fully adjustable Auto-Lid quickly attaches to automatic squeegees and holds them securely for rapid cleaning.

Power Tool Adapter

The Shur-Loc Squeegee Clean Power Tool Adapter can be used to turn the Squeegee Clean into an automatic machine by simply removing the manual handle and using an electric drill motor.

Storage Lid

When not in use, the Shur-Loc Squeegee Clean Storage Lid covers the Squeegee Cleaner in order to prevent chemical fumes from escaping and the solvent from evaporating.
